

DOVRE CONTINUES TO ASSIST STATOIL IN PROJECT ADMINISTRATION CONSULTANCY

Dovre signed a long-term framework agreement with Statoil

Dovre Group AS was awarded a three-year framework agreement within Project Administration Consultancy with Statoil ASA. The scope of work includes project management, project control and supply chain management.

Replacing the existing contract, the new agreement includes the project management competence area in addition to project control and supply chain management. Statoil has entered into several parallel agreements within the scope.

"Dovre is very proud of being reselected as a supplier to Statoil. We are committed to continue to contribute professionally in Statoil's projects as part of the team. Statoil is a leading corporation in the oil & gas sector and is currently our largest customer in Norway. In order to develop our company further, we focus on working with the industry leaders both in Norway and internationally," says Arve Jensen, EVP of Dovre Group Norway.

Dovre has a long relationship with Statoil. In 1984, Dovre delivered its first consultants in Statoil's Mongstad project. Since then Dovre has assisted Statoil in many of its demanding oil and gas projects, such as Gjøa, Snøhvit, Norne, Troll and others.
